

# Don't get scammed

**Don't send money or give out personal information over the phone or by text.**

Banks, government and companies will not ask you to pay a bill on the phone.

**Don't believe caller ID.**

Scammers can put up fake caller ID information. It may look like it's from someone you know when it's not.

**Know the risks of wiring money and gift cards.**

These methods of payment don't provide fraud protection. Real companies won't ask you to do this.
