<p>Squeezing, pressure, indigestion feeling, or pain (often dull) in the chest. The pain may spread to the arm, neck, jaw, or back. Symptoms come on or are made worse by stress or physical exertion. They ease with rest.</p>	<b>Angina.</b>	See <b>Angina</b> at <a href="http://www.HealthyLearn.com">www.HealthyLearn.com</a> .

## Chest Pain, Continued

Signs & Symptoms	What It Could Be	What To Do
The pain is on only one side of the chest and is not affected by breathing. A burning feeling and a skin rash are at the site of the pain.	<b>Shingles.</b>	See <b>Shingles</b> at <a href="http://www.HealthyLearn.com">www.HealthyLearn.com</a> .
Vague pain in the chest (if any). Shortness of breath; chronic fatigue; cough with phlegm or blood; night sweats; appetite and weight loss; and fever.	<b>Tuberculosis (TB).</b> Chronic lung infection with a certain bacteria.	See doctor.
Burning feeling in the chest or just above the stomach that comes and goes before, during, or after eating. It gets worse when you bend over or lie down.	<b>Heartburn or hiatal hernia.</b> <i>{Note: This could also signal a heart attack.}</i>	See <b>Heart Attack, Heartburn &amp; Indigestion, Hiatal Hernia, and Peptic Ulcers</b> at <a href="http://www.HealthyLearn.com">www.HealthyLearn.com</a> .
Chest pain that worsens with deep breaths, coughing, or touching the chest or ribs.	<b>Pleurisy.</b> The membrane that surrounds the lungs is inflamed. <b>Muscle strain or rib injury.</b>	See doctor for diagnosis. See, also, <b>Sprains, Strains &amp; Sports Injuries</b> at <a href="http://www.HealthyLearn.com">www.HealthyLearn.com</a> .
Chest pain with fever and coughing up green, yellow, or gray mucus.	<b>Flu, pneumonia, bronchitis,</b> or other upper respiratory infection.	See doctor. See <b>Colds &amp; Flu, Pneumonia, and Bronchitis</b> at <a href="http://www.HealthyLearn.com">www.HealthyLearn.com</a> .
Sudden, sharp pain below the left nipple that lasts less than a minute or so.	<b>Precordial catch syndrome.</b> This harmless, recurrent problem usually occurs in young adults.	See doctor for diagnosis. Try daily stretching exercises to reduce getting these pains.
Pain and tender feeling in the upper part of the chest. The pain gets worse when pressure is applied to the area. It can get worse with deep breaths, too.	<b>Costochondritis.</b> This is inflammation where the ribs attach to the breastbone.	See doctor for diagnosis. Take an OTC medicine for pain and swelling. Apply a heating pad set on low or a hot water bottle to the area of pain.
